DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the restriction requirement set forth in the Office Action dated May 2, 2001 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that all of the claims can be searched simultaneously and that only a nominal burden would be placed on the examiner to examine the additional classes and subclasses necessary to determine the relevant art. This is not found persuasive because claims belonging to Group I are directed to prior art of a completely different class than the claims of Group II and thus all claims cannot be searched simultaneously.

The requirement is still deemed proper and is therefore made FINAL.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2851

In claim 7, line 7, the phrase "light coming the pattern surface" makes no sense and therefore renders the claim indefinite. Claim 10 depends from claim 7 and thus contain the same deficiencies.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5-11 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishi et al (US 5591958).

Re clms 1,2,5-11 and 15: Nishi et al discloses an exposure apparatus (Fig 1), comprising: an illumination optical system (36,38,40) for illuminating an original (12) with exposure light (EL) from a light source (23); a projection optical system (8) for projecting a pattern of the original, illuminated by the illumination optical system, onto a substrate (5); a photo detector (54) disposed at a position optically conjugate with the original; control means (22A) for controlling an output of the light source on the basis of (Col 11 line 37) an output of the photo detector (54); and correcting means (25) for reducing an influence of reflection light from the original, on the basis of (Col 11 line 33-36) an output of the photo detector as the original is illuminated (Col 11 line 21) by the illumination optical system.

Conclusion

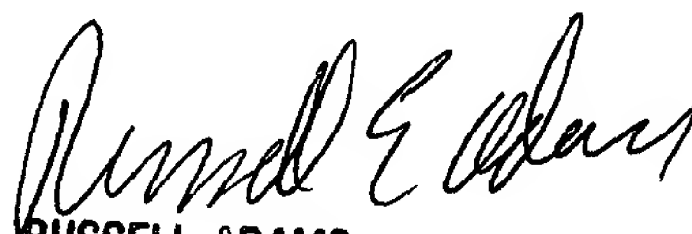

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miyai et al 5581324 and Magome 5004348.
